

On the Czech market since 1996

MOBILE SHELF RACKS

Reduce your space costs and increase storage capacity by as much as 80%. Do you have a problem with storing an increasing amount of papers, files and archived documents? And do you not want to pay for other premises or relocate your registry? Choose the application of the mobile rack systems.

The principle of this system is that the racks move on rails and fit tightly against each other. The operator always opens only the aisle they need to access, which reduces the need for area.

This is why this solution is used especially in premises where a large volume of goods needs to be stored in a small space.

> CHARACTERISTICS

- > Modular system
- > Designed for storing small-sized /documents
- > Screwless version
- > Height adjustable at 25-mm intervals
- > Maximum rack height of 4,000 mm
- > Shelf length of 770 / 870 / 970 / 1,070 / 1,170 / 1,270 mm
- > Shelf depth 300 / 350 / 400 / 500 / 600 / 700 mm
- > Shelf load-bearing capacity 70–390 kg

We will design appropriate handling equipment for a specific project.

> ADVANTAGES

- > Easy installation
- > Easy adjustment
- > Modularity
- > High strength, stability, long lifetime
- > Wide range of accessories

> DESIGN

- > Made from frames and shelves
- > Frame made from U-sections, perforated at 25-mm intervals, connected with fixed partitions
- > Screwless fixing of shelves to frames using hooks

> ADVANTAGES

- > higher warehouse capacity
- > reduced built-up area
- > high rate of investment return
- > verified by 10 years of experience
- > possible construction in stages
- > rails in or on existing floor
- > arrange for floor stress analysis
- > wide range of accessories: door, drawers, locking-type blocks, etc.

These systems can increase capacity of your archival and storage space by as much as 80%.

Mobile shelf racks are used to store all types of archival items, from regular computers, archival boxes and books, to various atypical archival units, such as objects of collections in museums, heritage institutes and galleries. In such cases, we design the storage technology in close cooperation with the client, tailored to the material to be stored.

- > Masaryk University in Brno
- > Moravian Gallery in Brno
- > Moravian Regional Museum
- > District Archives of Blansko
- > Heritage Institute in Brno

This progressive type of mobile rack systems helped replace the obsolete stationary racks that require more space and no longer meet the requirements for maximum economy of space or provide easier access, anti-dust protection, optional locking-type storage and a number of other advantages that our storage and archival technology ensures. The main advantage of the system is the creation of only one service aisle, thus enabling maximum utilisation of the given space.
