

On the Czech market since 1996

## MOBILE PALLET AND CANTILEVER RACKS

STORAGE TECHNIQUE  
CONSULTANCY

- > Lower construction costs. You do not need to build another hall and you will store more material in your existing premises.
- > Maximum storage space by elimination of aisles. You will get an additional 75% of storage space.
- > Possible remote control of travel directly from the handling truck.
- > Control of lighting only in the open aisle.
- > Rails can be installed in the floor or on already finished floor.
- > Possible construction in stages – installation of rails and subsequent installation of the individual undercarriages.

- > production warehouses
- > special warehouses
- > automotive industry
- > high adjustability of superstructures
- > servicing and installation teams throughout the Czech Republic
- > coordination with the construction design and completion

## > REFERENCE PROJECTS
